

Predsednici *SEG* studentskih sekcija kroz program *SLS* stiču znanja koja se odnose na liderske veštine, timski rad i usavršavanje komunikacionih veština. U okviru dvodnevnog intenzivnog programa, studenti će u Denveru imati priliku da razgovaraju sa predsednikom *SEG*-a, pratiće prezentacije najaktivnijih studentskih sekcija, predavanja stručnjaka iz kompanije *Chevron* i drugih vodećih naftnih kompanija, ali će i rešavati konkretne strateške probleme u saradnji sa članovima Izvršnog odbora *SEG*-a.

SLS stipendijom pokriveni su svi troškovi putovanja, smeštaja i registracije na godišnjem kongresu *SEG International Meeting for Applied Geoscience & Energy (IMAGE)*, u okviru koga se ovaj program izvodi.

Prošle godine, stipendiju *SLS* dobio je naš student sa istog smera, **Durica Surla**.

Dear Aleksandar,

On behalf of Chevron, welcome to the SEG Student Leadership Symposium and congratulations on your selection. Chevron is very proud to sponsor this event, which is part of our ongoing commitment to the future of geophysics from both a technical perspective and talent perspective. You are the people that make it happen and you are part of that commitment.

Leadership is about setting direction, providing vision and empowering others to achieve their goals. Leadership is a key component of Chevron's vision to be the global energy company most admired for its **people, partnership and performance**. I applaud your accomplishments in leadership which have been visibly recognized by your selection to this symposium. I hope you take full advantage of everything offered to you throughout the entire program, working in partnerships and teams to generate a better result and to learn from each other. Your experience will provide a broad appreciation for what technical leadership is and what it may mean for you throughout your career.

I wish you the best for success in your studies going forward and thank you for being a part of this symposium.

Best regards,

A handwritten signature in black ink, appearing to read "E.S.", with a long horizontal flourish extending to the right.
